## COURSES TAUGHT

NAME	DESCRIPTION	PERIOD
Intermediate Microeconomics	This course explores fundamentals of microeconomics theory, focusing on the behavior of individuals and firms, and their interaction in and with the market. It further considers the effects of government policies, market power and externalities on market efficiency.	2013 - TO-DATE
Intermediate Macroeconomics	The course provides learners with detailed knowledge of principal theoretical models used in macroeconomics, especially covering the debates and controversies of recent years. It exposes students to tools used in macroeconomic theory to analyze ongoing macroeconomic debates, theories and models that the learners can then use in investigating and answering some of the most complex questions of modern macroeconomics.	2013 - TO-DATE
Development Studies	Theories, models and emerging issues in development, with particular emphasis on sustainable development in emerging economies.	2013 - TO-DATE
Economic Growth and Development	The course exposes learners to economic growth theories and models, factors inhibiting growth in different types of economies, causes and impacts of growth and development among nations, International Trade and its impacts on the economies of nations.	2013 - TO-DATE
