#### COURSES TAUGHT

NAME	DESCRIPTION	PERIOD
Electrodynamics	Very fundamental in understanding the rapidly changing electric and magnetic fields	september, 2019 - TO-DATE
Space Mechanics	Vital in the understanding the motions of artificial satellites and space vehicles moving under the influence of forces such as gravity, atmospheric drag, thrust, etc	september, 2019 - TO-DATE
Geophysics	In depth application of the principles of physics to the study of the Earth. It deals with such things as the movement of the Earth's crust and the temperatures of its interior. Another subject is the behavior of the still-mysterious geomagnetic field.	september, 2019 - TO-DATE
Data Analytics	Big Data Analytics, Data Visualization using Tableau, Python, R and MATLAB	October 2014 - TO-DATE
