## COURSES TAUGHT

NAME	DESCRIPTION	PERIOD
Diploma in Public Health	The Diploma in Public Health is a program developed on the premise that the overall health and well-being of humans is dependent on prevention of disease and promotion of health. In line with the philosophy of the Technical University of Kenya focused in providing a critical mass of personnel with requisite knowledge and technical skills. The programme will impart knowledge and skills to address risks and causes of disease. Communities tend to place themselves at risk of exposure to diseases.	01/2021 - TO-DATE
Bachelor of Public Health	The Bachelor of Public Health is established on the premise that environmental improvements are more cost- effective as health measures than curative services. The Bachelor of Public Health programme is designed to inculcate values and help develop and implement strategies to improve health and promote healthy environment to enhance quality of life.	01/2021 - TO-DATE
Bachelor of Technology in Health Systems Management	Bachelor of technology in Health Systems management programme is aimed to produce transformational scholars of high integrity who have a theoretical, analytical and practical application of knowledge, skills, and attitudes to provide leadership in health organizations for the effective management of health services for lasting change in individuals and society.	01/2025 - TO-DATE
Bachelor of Technology in Community Health and wellness	A healthy community is the foundation for a productive society. Every community needs a healthy workforce for stability and sustainable development. Demographics, socioeconomics, genetics, political, cultural, environment and behavioral factors are among those that contribute to wellness and health.	01/2021 - TO-DATE
Diploma in Health Records and Information Technology	The focus of this programme is to produce Medical records and health information technicians with strong 'hands-on' skills that capture, extract and process records in health sector for the purposes of quality health service delivery. The programme is a continuation of the traditional technician programme that the University has run over the years.	01/01/2021 - TO-DATE
Bachelor of Science in Health Records Information Management	This program is concerned with health-related information and the management of systems. It prepares individuals to plan, design, and manage systems, processes, and facilities used to collect, store, secure, retrieve, analyze, and transmit health records and other information used by clinical professionals and health care organizations.	01/2021 - TO-DATE
