COURSES TAUGHT

NAME	DESCRIPTION	PERIOD
Database Design and programming	This course engages students to analyze complex business scenarios and create a data model—a conceptual representation of an organization’s information. Participants implement their database design by creating a physical database using any preferred DBMS with SQL. This course culminates with a project that challenges students to design, implement, and demonstrate a database solution for a business or organization.	July 2021 - TO-DATE
Web development and internet based Programming	This course is designed to help students to be able to describe the structure and functionality of the world wide web, create dynamic web pages using a combination of HTML, CSS, and JavaScript, apply essential programming language	January 2021 - April 2021
